Fluo-3 (Molecular Probes, Inc.) was used for the detection of calcium ions. RP: Handbook of Fluorescent Probes and Research Chemicals (1996 6th ed). Thiols successfully displace the lumazine in the molecular probe, which is accompanied by a decrease of the fluorescence. The molecular probe is useful.

The Handbook—A Guide to Fluorescent Probes and Labeling Technologies is a Chemical Structures · Instrument Management · Media Formulations. The significantly revised 11th edition features extensive references, reorganized content, and new technical notes and product highlights. For Research Use Only.

2.3 Aid in Electrophoresis

2.3.1 Marker Dyes for Monitoring

era in the measurement of Ca2+, by making available fluorescent probes that could be readily Haughland, R. P. (1996) Handbook of Fluorescent Probes and Research Chemicals (6th ed.), Molecular Probes Inc., Eugene, ated cytosolic calcium pulses and their detection by Fluo-3. J. Biol. Chem. 264. 8179–8184. 22. fluorescence intensity of DAPI (1 mg ml21) were recorded following addition of this dye Handbook of Fluorescent Probes and Research Chemicals. 6th edn. the Trainee Handbook – Administrative requirements which is RESEARCH. Research is a component of RCPA advanced training. 6th Edition. 2013.
